

GIS as a Powerful Communication and Community Empowerment Tool

ESRI ArcGIS Custom Analysis

Regional and National Level Maps

Created for Native Diabetes Wellness Program, Division of Diabetes Translation, Centers for Disease Control and Prevention.

Map created for Pacific Islands Chronic Disease Coalition.

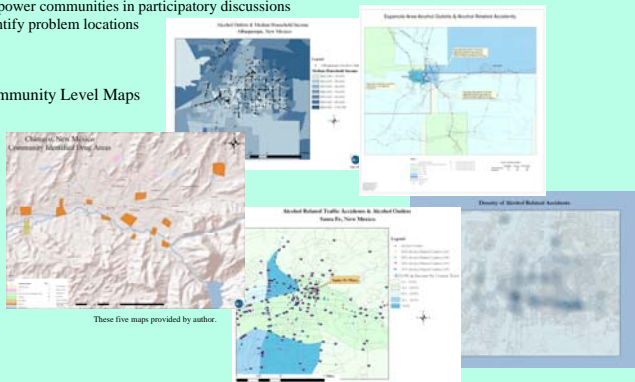

Centers for Disease Control and Prevention: National Diabetes Surveillance System. Available online at: <http://www.cdc.gov/diabetes/statistics/index.htm> Retrieved 4/7/2010.

Visual displays of community data

- Engage community members in awareness about problems
- Track progress in programs
- Empower communities in participatory discussions
- Identify problem locations

Community Level Maps

These five maps provided by author.

“...maps based on local data make the information about cancer rates more meaningful to people who are familiar with the local area.”

Beyer KMM, Rushon G. Mapping Cancer for Community Engagement. Prev Chronic Dis 2009;6(1).

Shawn L Penman, PhD
spenman@edac.unm.edu

Earth Data Analysis Center, University of New Mexico

GIS – Geographic Information Systems

Why Maps?

- Clear concise communication
- Raise awareness
- Track change

What Audience?

- What is the message?
- How will the message be used?
- Customize message to audience
 - Local level maps for community audience
 - Regional level maps for policy level communication

What Data?

- Mapping challenges and barriers
 - access to food
 - access to healthy food
 - exercise and recreation facilities
 - healthcare
- Demographic Information
- Environmental Information
- Other Location Information

Communicating to Policy Makers

Prostate, female breast cancer death rates per 100,000 person-years by congressional district (age-adjusted 2000 US population), 1990-2001. Kristian Larson and Jason Gilliland *International Journal of Health Geographics* 2006, 5:28.

“The cancer mortality patterns by congressional district are generally similar to the patterns seen using other geographic boundaries. However, the patterns by congressional district may be useful to cancer control advocates to illustrate the importance of cancer control measures (prevention, early detection, and treatment) for their constituents.”

U.S. Congressional District Cancer Death Rates. Yongping Hao, Elizabeth M Ward, Almesdin Jemal, Linda W Pickle and Michael J Thun. *International Journal of Health Geographics* 2006, 5:28.

Communicating to Community

Mapping the evolution of 'food deserts' in a Canadian city: Supermarket accessibility in London, Ontario, 1961-2005. Kristian Larson and Jason Gilliland *International Journal of Health Geographics* 2008, 7:16.

“Increasing the availability of neighbourhood socioeconomic, health, and environmental characteristics will allow individuals to obtain the knowledge needed to make informed decisions concerning their own health risks...”

J.C. MacLachlan et al. / Health & Place 13 (2007) 72-86.

Google Maps Community Participation

Everyone loves maps and Google Maps offers an easy, free platform for creating community maps.

- Google Maps can be either open to the public or can be unlisted
- Public maps are automatically included in Google Maps searches
- Personal photos can be added to these maps
