## Disclaimer

- The findings and conclusions in this presentation are those of the author(s) and do not necessarily represent the views of the Centers for Disease Control and Prevention/the Agency for Toxic Substances and Disease Registry

SAFER • HEALTHIER • PEOPLE

## Agenda

- Standards Landscape
- HITSP Artifacts
- HITSP Interoperability Specifications
- HITSP Lab Report to EHR and Public Health Lab Result Message/ELR IG
- New AHIC Use Cases directly relevant to public health

SAFER • HEALTHIER • PEOPLE

## Landscape – AHIC A Public and Private Sector Collaborative

AHIC is the public-private collaborative that sets priorities and oversees and/or endorses HIT Standards, certification, the NHIN, and polices on a national level.

- AHIC: American Health Information Community
- HITSP: Health Information Standards Panel
- CCHIT: Certification Commission for Health IT
- NHIN: Nationwide Health Information Community
- HISPC: Health Information Security and Privacy Collaboration
- State-Level HIE Initiatives: State-level Health Information Exchange Initiatives

# HITSP Lab Report to EHR and Public Health Lab Result Message/ELR IG

- Introduction
- Messaging
- Messages and Segment
- Supplementary Material

SAFER • HEALTHIER • PEOPLE

## Introduction – Purpose & Scope

- Specification for laboratory results reporting to local, state, territorial and federal public health agencies
- Each state and territory has its own requirements for laboratories to report certain findings to health officials
- This specification covers the exchange of laboratory results from the testing source to appropriate local, state, territorial and federal public health agencies
- Focuses on key points of broad interoperability
- Use of strong identifiers for key information objects
- Use of vocabulary standards

SAFER • HEALTHIER • PEOPLE

## Messaging

- Messaging Infrastructure
  - Messaging Framework – delimiters, null values, lengths, and snapshot processing
  - Use of Escape Sequences
  - Data Types
- Use Case Model
- Dynamic Interaction Model
- Dynamic Definition – details needed for an HL7 profile
- Interactions

SAFER • HEALTHIER • PEOPLE

## Message and Segments

- Message structures for:
  - ORU^R01^ORU\_R01 (Unsolicited Observation Message)
  - ACK^R01^ACK
- Segment and Field Descriptions
  - MSH, SFT, MSA, ERR, PID, NK1, PV1, PV2, ORC, OBR, OBX, SPM and NTE segments

SAFER • HEALTHIER • PEOPLE

## Observation Identifiers, Observation Values, Interpretations and Comments

- Provides guidance use of observation identifiers (OBX-3) in conjunction with observation value (OBX-5), interpretations (OBX-8) and comments
- Links the LOINC<sup>®</sup> scale property with the data type to be used with OBX-5 value

SAFER • HEALTHIER • PEOPLE

## Supplementary Material

- Code Systems and Value Sets
- Example ELR Messages
- Appendix A – HL7 Reporting of Culture and Susceptibilities
- Appendix B – Clinical Laboratory Improvements Amendment Considerations

# New AHIC Use Cases Directly Relevant To Public Health

- Two Use Cases
  - Immunizations & Response Management
  - Public Health Case Reporting

SAFER • HEALTHIER • PEOPLE

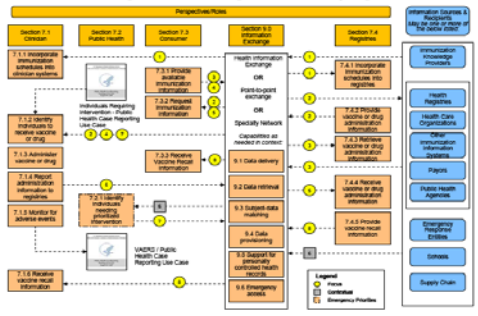

U.S. Department of Health and Human Services  
Office of the National Coordinator for Health Information Technology

Immunizations & Response Management  
Detailed Use Case  
March 21, 2008

## 7.0 Scenario 1: Vaccine and Drug Administration and Reporting

Figure 7-1. Vaccine and Drug Administration and Reporting

SAFER • HEALTHIER • PEOPLE

## Immunizations & Response Management

- **Release I:**
  - Artifacts for communication of vaccination information between patients, providers, and immunization registries, including registry-to-registry communication
  - Allow for optionality of architectures supporting traditional legacy message-based communications, addition of support for patient identification services (TP22, T23), and the addition of support for document-centric sharing and point-to-point communications for PHR Interoperability
  - Include security and privacy constraints for implementation of the Immunization and Response Management Interoperability Specifications
- **Release II:**
  - Identify specification and standard business workflows for supply chain and distribution management of vaccines and develop needed artifacts
  - Incorporation of the vaccine recall processes in the supply chain management.
  - Incorporation of pending constructs supporting Clinical Decision Support

SAFER • HEALTHIER • PEOPLE

## Immunizations & Response Management

### *New Constructs*

- **Component: Identify communication recipients**
- **Transaction Package: Immunization Feed**
  - Component: Vaccination (VXU/VXR)
- **Component: Unstructured document (communicate generic information to patient)**
- **Component: Generic alert to identified providers (communicate non-patient specific information)**
- **Transaction Package: Immunization Query & Response**
- **Referencing Public Health Case Reporting constructs (for reporting adverse reaction to Vaccination)**
- **Terminology Services (requirements driven by other use cases)**
- **Deferred**
  - **Clinical Decision Support Content (immunization schedules, reminders)**
  - **Vaccination Documents (including Consumer vaccination view)**
  - **Medication Administration**
  - **Supply Chain management (inventory management, vaccine recall)**

SAFER • HEALTHIER • PEOPLE

# Immunizations & Response Management

## Reuse of Existing Constructs

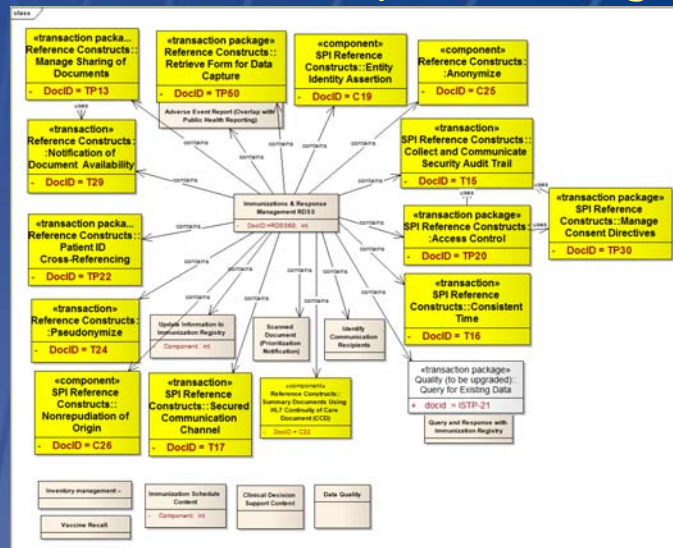

- Transaction Package: Immunization Feed Package (PIX/PDO, TP13)
- TP 50 Retrieve Form for Data Capture – for PHCR adverse reaction to immunization
- TP 21 Query for Existing Data
- TP 13 Manage Sharing of Documents
- C48 HITSP Summary Document
- C32 HITSP Encounter Document
- C25 Anonymize
- T24 Pseudonymize
- T23 Patient Demographics Query
- T29 Notification of Document Availability
- T22 Patient ID Cross-Referencing
- T16 Consistent Time
- T17 Secured Communication Channel
- C26 Nonrepudiation of Origin
- C19 Entity Identity Assertion
- T15 Collect and Communicate Security Audit Trail
- TP30 Manage Consent Directives
- TP20 Access Control
- T31 Document Reliable Interchange
- T33 HITSP Transfer of Documents on Media Transaction

Public Health Case Reporting Use Case

- *Public Health Case Reporting*
  - *Content Standardization in Progress*
  - *Ongoing Content Source: Council of State and Territorial Epidemiologists (CSTE)*
- *Adverse Event Reporting*
  - *Content Standardization in Progress*
  - *Ongoing Content Sources:*
    - *Adverse Drug Events – FDA*
    - *Patient Safety – TBD*
  - *AHRQ Patient Safety Data Set Public Comment 9 Aug 2008*
  - *CDC Healthcare Associated Infection definitions / reporting*
  - *Patient Safety Organization (PSO) instantiation*

## Report from the Population Perspective Technical Committee – Public Health Case Reporting Use Case

- 2008 – Trial Implementation Testing, Publication of Roadmap
  - **TP50 – Retrieve Form for Data Capture**
    - No determination regarding content structure within RFD
    - Content can be mapped to HL7 message – CDA, C32, C48, message or other
  - **One construct for trial content component consideration**
    - HL7 Healthcare Associated Infection (HAI) report
  - **Alerts: Reuse from IRM: Generic Alert to Identified Providers and Unstructured Document Components**
- 2009 – Release 1
  - **Content Standardization in Progress**
  - **Reporting Criteria Content – Common / basic (Structured content)**
  - **Refined Transmittal**

SAFER • HEALTHIER • PEOPLE

## Public Health Case Reporting Use Case

- 2010 – Release 2
  - **FDA MedWatch, Vaccine Adverse Event Reporting System (VAERS) – Pending successful ballot of Individual Case Safety Report (ICSR)v3 through HL7, ISO, CEN – Expected Dec 2009**
  - **AHRO Sentinel Event / Adverse Reaction Reporting**
  - **Public Health Case Reporting**
  - **Structured Reporting Criteria Content – Case-specific**
  - **Structured Communications from Public Health**
  - **Clinical Decision Support Content, Triggers**

SAFER • HEALTHIER • PEOPLE

## PH Case Reporting

- New Constructs (Introduction timing not indicated)
  - Case Reporting Terminology Component
  - Standard Case Report Construct Adverse Event Reports: (CDC-HAI, AHRQ, FDA, PH Cases)
  - Reporting Criteria Content: Basic and Case-specific
  - Clinical Decision Support Content (Trigger Events: PH, AE, AHRQ)
  - Identify Communication Recipients
  - Generic Alert to Identified Providers
  - Unstructured Document Components

SAFER • HEALTHIER • PEOPLE

## PH Case Reporting

### Reuse of Existing Constructs

- TP 50: Retrieve Form for Data Capture
- TP21: Query for Existing Data
- TP13: Manage Sharing of Documents
- C48: HITSP History Summary Using HL7 CCD
- C32: HITSP Encounter Documents Using IHE Medical Summary (XDS-MS Component)
- C25: Anonymize
- C35: HITSP Lab Report Technology Component Version
- C36: HITSP Lab Result Message Component
- C37: HITSP Lab Report Document Component
- T24: Pseudonymize
- T23: Patient Demographic Query
- T29: Notification of Document Availability
- T22: Patient ID Cross-Referencing
- T16: Consistent Time
- T17: Secured Communication Channel
- C26: Notification of Origin
- C19: Entity Identity Assertion
- T15: Collect and Communicate Security Audit Trail
- TP30: Manage Consent Directives
- TP20: Access Control
- TP31: Document Reliable Interchange
- TP33: HITSP Transfer of Documents on Media Transaction
